Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-18 are pending.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities: (a) Throughout the specification, it is suggested that the word "cassette" be changed to "magazine" to more closely relate to the term used in the prior art. It is noted that the word should be changed in the title and Abstract as well. Appropriate correction is required.

Claim Objections

3. Claims 1, 5, 9, 14 are objected to because of the following informalities: (a) claim 1 (and similarly for claim 9) the word "indention" should be changed to "indentation"; (b) claim 6 (and similarly for claim 14), the word "buffer" should be changed to "shock-absorbing" for consistency. Appropriate correction is required.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: claim 1 recites "An optical disc cassette for holding a plurality of optical discs, comprising: a housing having an inner surface, an opening and a plurality of slide-track sets, wherein the slide-track sets are disposed on the inner surface and the slide-track sets extend in a direction towards the

Art Unit: 2627

opening; a plurality of optical disc carriers disposed inside the housing, wherein each optical disc carrier is free to slide along the slide-track sets and an edge of each optical disc carrier has an indentation thereon; and a cushioning pad disposed on the inner surface, wherein at least one of the optical discs within the respective optical disc carrier leans against the cushioning pad through the indentation.” Claim 9 recites every element in claim 1 and additionally recites an optical disc data processing module and a disc selecting mechanism.

The closest prior art in Takai (PGPub 20010038599) discloses an optical disc magazine which is considered to show a “cushioning pad” at the end of arm 133 (see FIG. 28) which contacts the disc to prevent it from popping out of the magazine. Takai’s trays, however, are not considered to slide along “slide-track sets” as they are rotatably provided in the magazine. It is not considered obvious to a skilled artisan to have provided sliding type tracks in the magazine of Takai, as it would not operate properly.

Conclusion

4. This application is in condition for allowance except for the formal matters as addressed, *supra*.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
